DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-8, 11-13, 16--24, are rejected under 35 U.S.C. 102(e) as being anticipated by Sahai et al.(US Publication 2002/0076010 A1).

Regarding claims 1, 12, 17, Sahai teaches an apparatus/method for delivering a voice mail message to a recipient, comprising:

a memory (0026, 0048); and

at least one processor, coupled to the memory, operative to (0047):

receive said voice mail message from a sender (0026);

obtain a presence status of said sender from a presence server (0028); and

deliver said voice mail message to said recipient to automatically respond to the sender an indication of a presence of said sender (0028).

Page 3

Art Unit: 2686

Regarding claims 2, 18, Sahai teaches a method/apparatus wherein said presence server extracts presence information from a plurality of presence data stores (00031-0032).

Regarding claims 3, 19, Sahai teaches a method/apparatus of claim 2, wherein said presence server translates said presence information to a standard format (0039).

Regarding claims 4, 20, Sahai teaches a method/apparatus wherein said presence server determines said presence status of said sender based on one or more rules that aggregate extracted presence information (0032).

Regarding claims 5, 21, Sahai teaches a method/apparatus wherein said recipient responds to said sender in another domain (0032).

Regarding claims 6, 22, Sahai teaches a method/apparatus wherein said presence information indicates if the message sender can be reached at one or more indicated devices (0032).

Regarding claims 7, Sahai teaches a method of claim 1, wherein said presence information is obtained from a user registration process (0027).

Application/Control Number: 10/672,633

Art Unit: 2686

Regarding claims 8, Sahai teaches a method of claim 1, wherein said presence information is obtained by observing activities of a user (0032-0033).

Regarding claims 11, 16, 23, Sahai teaches a method/apparatus wherein said recipient can respond to said sender using a non-textual form of communication (0031).

Regarding claim 13, Sahai teaches a method of claim 12, wherein said providing step allows said recipient to respond to said sender in another domain (0031-0032).

Regarding claim 24, Sahai teaches an apparatus of claim 17, wherein said presence status indicates a presence status of said sender across a plurality of domains (0032-0033).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 9-10, 14-15, are rejected under 35 U.S.C. 103(a) as being unpatentable over Sahai (US Publication 2002/0076010) in view of Haim (US Patent 6,718,014)

Application/Control Number: 10/672,633

Art Unit: 2686

Regarding claims 9, 14, Sahai fails to teach a method/apparatus wherein said recipient can respond to said sender in real time. However, Haim teaches a method/apparatus wherein said recipient can respond to said sender in real time (col 4 lines 5-15, col 1 lines 8-14). Therefore, it would have been obvious to ordinary skill in the art at the time the invention was made to combine the above teaching of Haim with Sahai, in order to notify the user of the incoming telephone call in response to the telecommunication interface intercepting the incoming telephone call prior to ringing of the incoming telephone call.

Page 5

Regarding claims 10, 15, Sahai fails to teach a method wherein said recipient can respond to said sender in non-real time. Haim teaches a method wherein said recipient can respond to said sender in non-real time (col 1 lines 8-14, col 4 lines 5-15). Therefore, it would have been obvious to ordinary skill in the art at the time the invention was made to combine the above teaching of Haim with Sahai, in order to notify the user of the incoming telephone call in response to the telecommunication interface intercepting the incoming telephone call prior to ringing of the incoming telephone call.

Response to Arguments

4. Applicant's arguments with respect to claims 1-24 have been considered but are most in view of the new ground(s) of rejection.

Art Unit: 2686

Conclusion

5. Any responses to this action should be mailed to:

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Naghmeh Mehrpour whose telephone number is 571-272-7913. The examiner can normally be reached on 8:00-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marsha Banks-Harold be reached (571) 272-7905.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
